DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record issued to Carr fails to teach or suggest a multi-carrier receiver for receiving a multi-carrier signal and to demodulate data symbols from a set of carriers formulated the multi-carrier signal, further including an antenna selector for selecting at least two carriers as antennas for estimation of characteristics of a narrowband disturber, wherein the selection of at least two antennas amongst all carriers located inside a predetermined frequency band, and a power spectral density of the multi-carrier signal has to be below a threshold value, and at least two carriers located outside the predetermined frequency band as called for in claim 1. Meanwhile, Carr is concerning about tuning the receiver to receive desired signals, converted received signals to IF signals and providing image rejection. Carr is silent on selecting at least two carriers for estimation of characteristics of a narrowband disturber; in addition, Carr's antenna is an element of the receiver, while antenna of claim 1 are carriers; and Carr does not show that at least two carriers located outside the predetermined frequency as in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
